**Re: Generating System Data and Model Guidelines Rules Consultation
Draft Determination and Report**

Dear Paul,

Thank you for the opportunity to comment on the Generating System Data and Model Guidelines Rules Consultation Draft Determination and Report.

The Clean Energy Council (the Council) has reviewed the Draft Determination and Report and has no major issues with the documents and notes that NEMMCO has taken on board many of the comments made in the submissions to the initial paper. Individual Council members may have issues that they may wish to raise in their own submissions.

The Council expects that the generating system data and model guidelines will evolve over time as systems change and technologies mature and looks forward to participating in future consultations on this subject.

If you have any questions please me on ph: 03 9929 4105 or email:
rjackson@cleanenergycouncil.org.au

Yours sincerely

Rob Jackson
Manager Policy Development
Clean Energy Council
