

Tasmania - connection flowchart

Clean Energy Council

- Customer to do own research
- Customer finds a CEC Accredited Installer
- Installer selects/designs a PV system to meet the customer's requirements
- Network Connection Application made by Installer to Electricity Distributor
- Installer submits a Power Purchase Agreement with the Electricity Retailer
- Electricity Retailer approves Power Purchase Agreement
- Electricity Distributor approves Network Connection Application
- Electricity Distributor forwards Offer to Connect, and Network Connection Agreement to customer
- Customer signs Offer to Connect, and Network Connection Agreement
- Customer returns Network Connection Agreement to Electricity Distributor or Electricity Retailer
- Installer submits Electrical Work Request (EWR) and supporting documents to Electricity Retailer
- EWR instigates Business-to-Business (2B2) Service Order Request from Electricity Retailer to electricity distributor for meter installation
- Meter is installed
- Apply for any applicable Renewable Energy Certificates / Solar Credits
- Customer is switched to the default solar generation tariff
- Electricity Retailer makes the necessary changes to the Customer's account.
- Meter is installed and solar PV system is connected to the grid
